

Business Intelligence (BI) Developer

Computer Methods International Corp. (CMiC) is a software Development firm specializing in enterprise financial and cost management systems designed for the Construction and Engineering industries.

THE OPPORTUNITY

We currently have an opening for a Jaspersoft Business Intelligence (BI) Developer in a Full-time capacity. This position represents an excellent opportunity for a highly motivated and skilled individual. This position will assist in developing the Business Intelligence modules relating to Jaspersoft within our application. This position reports directly to the Manager of the Reports & BI Group.

Duties and responsibilities (may include, but are not limited to, the following):

- Design, develop, implement and support the BI Applications
- Evaluate alternative design approaches, and design technical processes to meet business requirements
- Write high quality and well-documented code according to accepted standards
- Test and debug BI modules in conjunction with the other aspects of our system
- Participate in project team meetings
- Collaborate with team members and other departments as appropriate
- Other related duties as assigned

SKILLS, BEHAVIOUR & EXPERIENCE

The successful candidate will have the following skills, behaviors and experience:

- University Degree, preferably in Computer Science
- Familiarity with databases, SQL, and any Reporting Tool
- Excellent communication skills – both written and oral

Because CMiC develops its software in-house, this position is a good fit for a motivated candidate who enjoys problem solving; we encourage our employees to think outside the box and take initiative in exploring creative solutions.

If you are interested, please e-mail your resume to careers@cmic.ca, subject: BI Developer.

No agencies please
Only those selected for an interview will be contacted
