

## Java Developer

Computer Methods International Corp. (CMiC) is a software Development firm specializing in enterprise financial and cost management systems designed for the Construction and Engineering industries.

### THE OPPORTUNITY

We currently have an opening for the position of Java Developer. Duties and responsibilities (may include, but are not limited to, the following):

- Be accountable for the development, support and maintenance of our CMiC Tools Application
- Evaluate alternative design approaches, and design technical processes to meet business requirements
- Write high quality and well-documented code according to accepted standards
- Participate in project and team meetings interacting and collaborating with team members and other departments as appropriate
- Other related duties as assigned

### SKILLS, BEHAVIOUR & EXPERIENCE

The successful candidate will have the following skills, behaviors and experience:

- University Degree, preferably in Computer Science
- 1 to 3 years hands-on professional Java programming experience.
- Demonstrable proficiency in Java programming, with an emphasis on server-side Java development
- Candidates having experience with Oracle ADF Faces are preferred
- Familiarity with databases and SQL
- Excellent communication skills – both written and oral

Because CMiC develops its software in-house, this position is a good fit for a motivated candidate who enjoys problem solving; we encourage our employees to think outside the box and take initiative in exploring creative solutions.
